Perficient - Senior Business Consultant - Rev Cloud/CPQ

Job URL

Dear Hiring Manager,

I am writing to apply for the Senior Business Consultant position at Perficient, as advertised. With over seven years of extensive experience in Salesforce platforms including CPQ, Revenue Cloud, and Sales Cloud, I have honed my skills in delivering tailored solutions that drive digital transformation effectively. At Docker and AWS, I successfully led initiatives that optimized quote-to-cash processes and integrated Salesforce capabilities into large-scale enterprise environments, demonstrating my capacity to elevate business outcomes through technology.

My role as a client-facing consultant involved conducting workshops and providing mentorship, where I consistently delivered reliable solutions with minimal oversight. I excel at identifying and mitigating risks early, ensuring continuous alignment with stakeholders. Additionally, my expertise in declarative building, data migration, and AI tools like Claude positions me excellently to meet Perficient's vision.

I am excited about the opportunity to bring my proven capabilities, supported by certifications such as the Salesforce Certified Administrator and CPQ Specialist, to your esteemed company's challenges. I look forward to discussing how my experience aligns with Perficient's needs in more detail.

Thank you for considering my application.

Best regards,

Triet Le
