Growth Opportunities

H1B Sponsor Likely

Responsibilities

Translate complex business requirements into scalable and flexible Salesforce-centric architectures

Define and govern Salesforce architecture standards, integration strategies, and data models

Lead solutioning within Health Cloud instance focused on Service/Cases

Partner with business and IT stakeholders to drive digital transformation initiatives

Design secure, multi-cloud, and multi-system integrations using API-led patterns (no middleware)

Design solutions for Omnistudio within Health Cloud – Integration Procedures, Omniscripts, FlexCards

Guide teams on Salesforce platform capabilities, data modeling, sharing and visibility architecture, and governor limits

Facilitate technical decision-making by evaluating trade-offs across design options and ensuring architectural alignment

Review solution designs and code to ensure compliance with architecture standards and Salesforce best practices

Mentor developers and technical leads across the project lifecycle

Support and participate in enterprise architecture forums and technology governance processes
