Job description

Accenture Federal Services - Salesforce Data Management Lead

Job URL

Salesforce Data Management Lead

Accenture Federal Services helps the US federal government strengthen national security, public safety, civilian, and military health missions through technology and ingenuity. The Salesforce Data Management Lead will design and execute data migration from Microsoft Dynamics and NetCRM into Salesforce, while directing data profiling, conversion, deduplication, reconciliation, and data governance activities.

Responsibilities

Own the end-to-end data migration strategy from Microsoft Dynamics and NetCRM into Salesforce (Person Account model)

Lead data profiling, field-level mapping, and transformation design using MuleSoft DataWeave in collaboration with Bank data stewards

Direct iterative mock-conversion cycles, production cutover extraction/load, and post-migration reconciliation

Design the native duplicate-merge/deduplication strategy, including Salesforce duplicate rules, custom Apex probabilistic matching, and a data-steward Lightning Web Component

Establish the data governance framework, including data-quality standards, access/security model alignment, and an archiving/retention strategy (hot/warm/cold tiering)

Prepare migration specification deliverables and reconciliation reports for Bank sign-off
