Responsibilities

Own and manage the Salesforce release calendar, roadmap, and deployment schedules

Coordinate releases across Salesforce Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud, and custom Salesforce applications

Collaborate with Product Owners, Architects, Developers, QA teams, Business Stakeholders, and DevOps engineers to ensure release readiness

Manage deployments across Development, SIT, UAT, Staging, and Production environments

Conduct release planning, impact analysis, dependency management, and risk assessments

Ensure adherence to enterprise release governance, compliance, and change management processes

Facilitate CAB (Change Advisory Board) reviews, approvals, and release communications

Coordinate code freezes, deployment windows, rollback strategies, and post-release validation activities

Manage release dependencies involving Salesforce integrations, middleware, and third-party systems

Monitor deployment success metrics, release KPIs, incidents, and continuous improvement initiatives

Lead emergency, patch, and hotfix deployments when necessary

Provide regular release status updates, risk mitigation plans, and executive-level reporting

Partner with support and operations teams to ensure smooth production transitions and post-deployment support

Drive DevOps adoption and release automation initiatives to improve deployment efficiency and quality
