Cover letter

Cardinal Integrated Technologies Inc - Salesforce Release Manager

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Release Manager position at Cardinal Integrated Technologies. With over 7 years of Salesforce experience combined with 4+ years leading release management and DevOps initiatives, I have a proven ability to oversee complex multi-cloud Salesforce release cycles in regulated environments such as healthcare and insurance.

In my current role at Docker, I own the Salesforce release calendar and roadmap, coordinating deployments across Sales, Service, and Experience Clouds. I have successfully implemented CI/CD pipelines using Salesforce DX and Metadata API, reducing manual deployment errors by 25%, and have extensive experience facilitating governance compliance, CAB approvals, risk assessments, and post-release support. Additionally, I lead emergency patch deployments to minimize downtime and drive continuous improvement in release processes.

My expertise in release planning, environment management, and cross-functional collaboration aligns directly with the challenges outlined in your job description. This experience, paired with my Salesforce Platform Developer certifications and knowledge of DevOps best practices, positions me to effectively manage and optimize your Salesforce release program.

Thank you for considering my application. I look forward to the opportunity to contribute to your team’s success.

Sincerely,
Triet Le
