Job description

Celigo - Senior Developer

Job URL

Senior Developer

Celigo is a modern Integration and Automation Platform (iPaaS) company that simplifies how businesses integrate, automate, and optimize processes. The Professional Services Senior Developer designs and delivers scalable integrations between ERP, SaaS, and cloud applications using Celigo integrator.io, while leveraging AI-enabled automation and agentic services. The role also provides client advisory, support, training, testing, governance, and mentorship.

Responsibilities

Collaborate with clients to gather requirements and translate them into scalable technical solutions

Utilize Celigo integrator.io to integrate ERP, SaaS, and on-premises systems

Design and implement data mappings and transformations to ensure data integrity across systems

Design and manage APIs, including defining endpoints, authentication, versioning, and governance best practices

Perform end-to-end testing and validation of integration solutions

Ensure best practices in performance, security, and governance

Provide go-live support, ongoing support, advisory services, and knowledge transfer to customers

Utilize Celigo’s AI capabilities — including AI Studio, agentic workflows, and MCP server orchestration

Design intelligent prompts and develop AI agents and solutions that drive real value for customers

Deploy and manage Celigo agentic services for intelligent automation use cases

Mentor junior developers and contribute to solution design reviews

Train customers on the use of Celigo’s integration platform

Required

Strong problem-solving skills with the ability to troubleshoot complex integration issues

Excellent verbal and written communication skills across technical and non-technical audiences

Client-facing professionalism with the ability to lead discussions, training, and advisory sessions

Self-starter with strong ownership, attention to detail, and ability to work independently

Ability to manage multiple priorities in a fast-paced, client-driven environment

Demonstrated business acumen and sound decision-making skills

Drive to self-learn and showcase emerging technologies, including AI and automation, to elevate the practice

Strong experience with API integrations and API management (REST, SOAP, webhooks, OAuth, token-based authentication)

Experience designing and managing APIs, including lifecycle management, versioning, security, and governance

Proficiency in JavaScript for scripting (hooks, transformations, custom logic)

Experience integrating ERP systems (NetSuite, Acumatica, Microsoft Dynamics, SAP, etc.)

Hands-on experience with cloud/SaaS platforms (Salesforce, Shopify, Amazon, etc.)

Data transformation expertise (JSON, XML, CSV, EDI, mapping, normalization)

Understanding of middleware and iPaaS architecture patterns

Experience integrating and operationalizing AI/LLM services

Familiarity with agentic architectures and orchestration concepts (e.g., Celigo agentic services, MCP servers)

Bachelor's degree in Computer Science, Software Engineering, Information Systems, or a related field

7+ years of experience as an Integration Developer or in a similar role

Experience in consulting or professional services environments with direct client engagement

Proven ability to design and deliver scalable, production-grade integration solutions

Experience across the full delivery lifecycle (requirements through post-go-live support)

Experience with technologies such as Node.js, web services (SOAP/REST), and data transport formats (JSON, XML, EDI, flat files)

Familiarity with enterprise applications (NetSuite, Salesforce, Amazon, Google, Shopify, HubSpot, etc.)

Strong database fundamentals (SQL, data modeling, querying)

Experience with AI-enabled integration patterns (LLMs, agentic services, MCP servers)

Preferred

Experience with legacy integration methods (FTP, ACH, fixed-width files, EDI) is a plus

Benefits

Remote-first culture, built on trust, collaboration, and transparency

Lightspeed learning opportunities to keep you at the leading edge of your field

Three weeks of vacation (starting year one)

Wellness days and holidays to recharge

Parental leave and a generous benefits package

Monthly tech stipend

Recognition and career development opportunities
