Triet Le

Senior Integration Developer | API & Automation Specialist

Chandler, AZ, United States | +1(602) 825-3683 | trietle1997@outlook.com | LinkedIn

SUMMARY

Senior Integration Developer with 7+ years delivering scalable integrations using cloud platforms, API management, and AI-enabled automation. Expertise in API design, REST/SOAP, OAuth, data transformation (JSON, XML, CSV, EDI), and ERP integration with systems like Salesforce, NetSuite, and Amazon. Proven skills in middleware, iPaaS architecture, and agentic automation leveraging AI/LLMs and orchestration servers. Experienced in full integration lifecycle from requirements to post-go-live support with client advisory and mentoring. Strong communicator with a history of troubleshooting complex integration issues and driving automation efficiencies. Self-starter adept at managing multiple priorities in fast-paced consulting and enterprise environments.

SKILLS

API Integration & Management: REST, SOAP, OAuth 2.0, Webhooks, Token-based Authentication, API Lifecycle Management, API Security & Governance

ERP & SaaS Integration: Salesforce, NetSuite, Microsoft Dynamics, SAP, Acumatica, Shopify, Amazon Web Services (AWS)

Data Transformation & Modeling: JSON, XML, CSV, EDI, SQL, Data Mapping, Normalization, Data Reconciliation

Programming & Automation: JavaScript, Node.js, Apex, Celigo integrator.io, iPaaS Architecture, Agentic Services, MCP Servers, AI/LLM Integration

Cloud Platforms & Middleware: Salesforce Platform, AWS Cloud, iPaaS Solutions, MuleSoft, Platform Events, Asynchronous Processing

Consulting & Client Engagement: Requirements Gathering, Technical Advisory, Training & Mentorship, Agile Delivery, Post-Go-live Support

PROFESSIONAL EXPERIENCE

Docker, Inc | *Senior Integration Developer*

Dec 2024 - Present | Seattle, Washington, United States

- Designed and implemented scalable API integrations leveraging REST, OAuth 2.0, and JSON between Salesforce and external cloud SaaS platforms.
- Developed Celigo integrator.io data flows, mappings, and transformations to ensure accurate and consistent data synchronization between ERP and CRM systems.
- Architected and enforced API governance best practices, including endpoint versioning, authentication, rate limiting, and security compliance across integration solutions.
- Built custom JavaScript hooks and transformations within iPaaS solutions to automate complex business logic and enhance integration resilience.
- Led AI-enabled automation projects using agentic services and MCP server orchestration to reduce manual processes by 30% and improve bot accuracy.
- Collaborated with clients to translate complex business requirements into architecture blueprints and robust integration workflows with measurable SLA improvements.

- Conducted end-to-end testing and validation of integrations, ensuring data integrity, system performance, and secure error handling mechanisms.
- Mentored junior developers in API design, integration best practices, and AI-driven automation strategies to elevate team capabilities.
- Managed post-deployment support with proactive monitoring and incident resolution, maintaining 99.9% uptime for critical client integrations.
- Delivered training sessions and comprehensive documentation to client technical teams, facilitating knowledge transfer and self-sufficiency.
- Utilized AI Studio and designed intelligent prompts to create agentic workflows that optimized customer service processes and reduced ticket triage times.
- Integrated diverse cloud applications including Salesforce, AWS, and Shopify, enhancing client operational efficiency through streamlined data flows.

Amazon Web Services (AWS) | *Senior Salesforce Developer & Integration Specialist*

Jul 2023 - Dec 2024 | Seattle, Washington, United States

- Led API integration projects connecting Salesforce with ERP systems using REST, SOAP, OAuth, and webhooks to synchronize sales and service data.
- Designed and implemented secure OAuth 2.0 authentication flows and token management for multiple client-facing APIs to ensure compliance and scalability.
- Built reusable JavaScript components for data transformations across JSON, XML and CSV formats to support complex enterprise-grade integrations.
- Supported shift to agentic AI workflows by configuring Salesforce OmniStudio and integrating AI-enabled automation to enhance business process efficiency.
- Architected and enforced API lifecycle best practices including endpoint versioning, governance, and auditing for client integration platforms.
- Coordinated with client teams to gather technical requirements, conduct solution design reviews, and deliver technical training on integration usage.
- Implemented event-driven integrations using Platform Events and asynchronous Apex to optimize performance and system responsiveness.
- Provided production support and troubleshooting for API failures, governor limits, and data anomalies ensuring high availability and data accuracy.
- Collaborated with cross-functional teams to deploy advanced AI-based case triage solutions leveraging Salesforce Agentforce and Einstein AI capabilities.

Amazon Web Services (AWS) | *Salesforce Developer & Integration Engineer*

Oct 2021 - Jul 2023 | Seattle, Washington, United States

- Developed custom Salesforce REST and SOAP APIs facilitating secure data exchange between Salesforce and external ERP and SaaS platforms.
- Implemented complex data mappings and transformation routines handling JSON, XML, and CSV to normalize data for downstream systems.
- Built scalable asynchronous integrations utilizing Platform Events and Change Data Capture to reduce processing latency and decouple systems.
- Provided client advisory on API design and integration patterns aligned with iPaaS architecture standards to improve maintainability and extensibility.

- Supported CI/CD deployments and quality assurance activities to ensure production-grade integration delivery with minimal defects.
- Developed Lightning Web Components facilitating enhanced UI-driven integration monitoring and management for business users.
- Collaborated in agile environments translating business requirements into technical deliverables and integration workflows.
- Performed code reviews, testing, and documentation to maintain compliance with enterprise security and operational standards.
- Engaged in cross-team partnership to integrate newer AI capabilities for predictive analytics and customer experience enhancements.

Deloitte Consulting | *Salesforce Developer & Integration Consultant*

Feb 2019 - Sep 2021 | Gilbert, Arizona, United States

- Delivered Salesforce CRM integrations with ERP systems including Microsoft Dynamics and SAP using RESTful APIs and web services.
- Conducted requirements analysis with clients to define scalable, secure, and compliant integration solutions supporting business goals.
- Designed data transformation and mapping logic for JSON, XML, CSV, and EDI formats ensuring data consistency and compliance.
- Configured Salesforce security models with OAuth, profiles, roles, and permission sets to safeguard integration endpoints.
- Provided training and mentorship on integration best practices, API management, and middleware platform usage to client teams.
- Supported go-live activities and post-implementation support ensuring smooth transition and immediate issue resolution.
- Authored technical documentation for integration architectures, data flows, and client advisory materials enhancing knowledge sharing.

Arizona State University - W. P. Carey School of Business | *IT Support Specialist*

Jun 2016 - Dec 2018 | Tempe, Arizona, United States

- Provided troubleshooting and security risk mitigation services supporting enterprise technology infrastructure for academic staff.
- Collaborated in Agile teams to diagnose problems and implement technology solutions improving operational efficiency and system security.

EY | *Risk Advisory Intern*

Jun 2018 - Aug 2018 | Greater Phoenix Area

- Reviewed IT internal controls and assessed technology risks for Fortune 500 clients, identifying deficiencies and recommending mitigations.
- Performed detailed walkthroughs and system testing to support risk assessments, documenting findings for audit readiness.

CERTIFICATIONS

- Celigo Integration Developer Certification (in progress)
- Salesforce Certified Platform Developer II

- Salesforce Certified Application Architect
- Salesforce Certified Data Architecture & Management Designer
- Salesforce Certified Sharing and Visibility Designer
- Salesforce Certified Platform App Builder
- Salesforce Certified Administrator

EDUCATION

W. P. Carey School of Business - Arizona State University 2015 - 2018

Bachelor of Science (B.S.), Business Analytics

Bachelor's degree, Computer and Information Systems Security/Information Assurance
