Cover letter

Cherokee Federal - Agentforce Salesforce Quality Assurance Tester

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Quality Assurance Tester position supporting the federal Agentforce initiative at Cherokee Federal. With over seven years of Salesforce development and quality assurance expertise, I have a proven track record executing comprehensive test plans across declarative configurations, Apex development, Lightning Web Components, and integrations using REST and SOAP APIs in regulated, Agile environments.

At Docker and AWS, I directly contributed to AI-powered Agentforce testing, validating natural language utterances, prompt templates, and multi-turn conversation flows using Agentforce Testing Center and Data Cloud grounding to ensure response accuracy and secure operation. I meticulously document defects with clear reproduction steps, severity ratings, and collaborate closely with Product Owners and government leads to align testing with acceptance criteria and release schedules.

My experience validating Salesforce Flows, complex automation, integration points, and managing defects via Jira and Azure DevOps aligns well with the testing challenges Cherokee Federal faces. I understand the importance of governance, auditability, and compliance in federal projects and have delivered executive-level test summaries and quality status reports for senior stakeholders.

I am confident my background in both Salesforce development and QA testing, combined with hands-on Agentforce knowledge and strong stakeholder collaboration skills, will enable me to effectively contribute to your team’s success.

Thank you for considering my application.

Sincerely,
Triet Le
