Cold Sun Enterprise - Salesforce Business Analyst

Job URL

Dear Hiring Manager,

Cold Sun Enterprise requires a Salesforce Business Analyst capable of bridging complex business needs with scalable Salesforce solutions. In my 7+ years of Salesforce experience, I have honed my skills in gathering and translating requirements into user stories and process flows, particularly within Sales Cloud and Service Cloud environments. At Docker and AWS, I facilitated discovery workshops and documented detailed business processes, supporting Agile teams to deliver solutions that align precisely with stakeholder goals.

I have successfully led user acceptance testing and adoption initiatives, contributing to digital transformation by creating clear acceptance criteria and training materials that enhance user engagement. My certifications and strong collaboration skills enable me to work effectively with Solution Architects and Developers to deliver high-value Salesforce implementations. My experience in security configuration and reporting further complements the role’s requirements.

I am confident my background in workshop facilitation, process documentation, and Agile delivery will allow me to contribute effectively to Cold Sun Enterprise’s digital initiatives and empower business users through innovative Salesforce solutions.

Sincerely,
Triet Le
