Testing & Deployment: UAT Support, Test Case Documentation, Release Management, Sandbox Testing, User Adoption Support

Tools & Methodologies: Jira, Confluence, Agile Scrum, Salesforce CLI, VS Code

Communication & Documentation: Workshop Facilitation, Business Process Documentation, Training Materials, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Docker, Inc | *Senior Salesforce Developer*

Dec 2024 - Present | Seattle, Washington, United States

- Facilitated discovery workshops to capture business requirements and translate them into detailed user stories and process flows for Salesforce solutions.
- Collaborated closely with solution architects and developers to ensure alignment of Salesforce build with business process requirements.
- Documented current and future business processes to support digital transformation and continuous improvement initiatives.
- Created acceptance criteria and test scripts to support rigorous user acceptance testing and quality assurance efforts.
- Supported end-user adoption by delivering training materials and conducting knowledge transfer sessions for new Salesforce features.
- Contributed to roadmap planning and prioritization in collaboration with product owners and business stakeholders.

- Improved Salesforce automation by refactoring legacy flows into modular, easy-to-maintain components, enhancing system scalability.
- Managed Salesforce security configuration including profiles, permission sets, and sharing rules to ensure data accessibility aligned with business roles.
- Developed dashboards and reports to provide KPIs visibility, enhancing operational decision making and process monitoring.
- Assisted in the integration design discussions to align technical solutions with business requirements and compliance needs.
- Led user feedback sessions to identify adoption challenges and recommend enhancements to improve business process efficiency.
- Supported release readiness through documentation updates, sandbox validation, and coordinating stakeholder sign-offs for deployed changes.

Amazon Web Services (AWS) | *Senior Salesforce Developer*

Jul 2023 - Dec 2024 | Seattle, Washington, United States

- Facilitated stakeholder interviews and workshops to gather Salesforce business requirements supporting sales and service processes.
- Documented detailed business process maps and user stories focusing on Sales Cloud and Service Cloud capabilities.
- Collaborated with Agile teams to prioritize and refine backlog items, ensuring alignment with business objectives and technical feasibility.
- Supported testing activities by preparing test cases, facilitating user acceptance testing, and tracking defect resolution.
- Led user adoption activities including training sessions and support documentation for new Salesforce functionalities.
- Configured Sales Cloud and Service Cloud components such as validation rules, flows, and approval processes aligned to business rules.
- Assisted solution architects and developers by providing clear requirements documentation and clarifying questions during build phases.
- Created dashboards and reports for leadership to monitor sales pipeline health, case resolution metrics, and service operations.
- Coordinated integration testing efforts with external systems ensuring seamless data exchanges and process continuity.

Amazon Web Services (AWS) | *Salesforce Developer*

Oct 2021 - Jul 2023 | Seattle, Washington, United States

- Supported Agile business analysis activities by refining Salesforce requirements and managing user story documentation.
- Collaborated with stakeholders to validate Salesforce functionalities for sales and service use cases across multiple teams.
- Documented Salesforce processes and developed process flows to streamline sales opportunity and case management.
- Participated in backlog grooming, sprint planning, and retrospectives to align delivery with business goals.
- Assisted testing teams with test case development and coordinated defect triaging to ensure release quality.
- Created reports, dashboards, and Salesforce configuration to support sales and customer service processes.

- Partnered with architects and developers to validate technical solutions against documented requirements.
- Supported end-user training and helped resolve adoption barriers, increasing system usage and data quality.
- Contributed to continuous improvement initiatives by recommending process optimizations based on user feedback.

Deloitte Consulting | *Salesforce Developer*

Feb 2019 - Sep 2021 | Gilbert, Arizona, United States

- Collected and analyzed business requirements for Salesforce implementations within healthcare payer environments.
- Facilitated workshops with business and IT stakeholders to document business processes and define user stories.
- Supported testing activities by developing acceptance criteria and coordinating user acceptance testing efforts.
- Collaborated with cross-functional teams to deliver Salesforce solutions meeting both business and regulatory requirements.
- Created Salesforce reports and dashboards that improved visibility into case management and member service operations.
- Managed Salesforce security configurations in compliance with HIPAA and internal data governance policies.
- Provided post-deployment support and end-user training to drive Salesforce adoption and process compliance.

Arizona State University - W. P. Carey School of Business | *IT Support Specialist*

Jun 2016 - Dec 2018 | Tempe, Arizona, United States

- Provided technical support and troubleshooting for Salesforce users including issue diagnosis and resolution guidance.
- Collaborated with senior technicians to design Agile solutions supporting enterprise IT challenges and user experience improvements.

EY | *Risk Advisory Intern*

Jun 2018 - Aug 2018 | Greater Phoenix Area

- Assessed technology risk and compliance for Fortune 500 clients, identifying gaps through walkthroughs and documentation review.
- Reported findings with precise detail, contributing to risk mitigation plans and improving IT control frameworks.
