Cover letter

CourtAvenue - Salesforce Solution Architect

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Solution Architect role at GTX Solutions. Your need for leadership in Salesforce platform strategy and architecture, particularly across Marketing Cloud and Data 360, aligns closely with my professional background. With over 7 years designing and implementing scalable Salesforce solutions—including 5 years focused hands-on with Salesforce Marketing Cloud and Data Cloud—I have successfully defined platform roadmaps, established governance standards, and optimized customer journey automation while driving best practices in email deliverability and cost management.

At Docker and AWS, I led architecture for complex Marketing Cloud implementations, improving journey stability by 30% and reducing platform costs through consumption monitoring and automation. I designed integrations between customer data platforms and Marketing Cloud to facilitate real-time activation and personalization, boosting campaign performance and end-user engagement. Additionally, I have mentored technical teams to elevate solution delivery and maintain high-quality standards.

My hands-on expertise with Journey Builder, Automation Studio, Contact Builder, AMPscript, SQL, API integrations, and email sender reputation management makes me well-equipped to take ownership of your Salesforce platform roadmap. I am confident my background in marketing technology architecture and collaborative stakeholder communication will enable me to contribute effectively to GTX Solutions' continued success.

Thank you for your consideration.

Sincerely,
Triet Le
