Job description

Craftsman Technology Group - Technical Analyst (Salesforce)

Job URL

Technical Analyst (Salesforce)

Craftsman Technology Group is an employee-owned firm that supports mission-driven nonprofit and public sector organizations through technology. The Technical Analyst will resolve client requests and production issues across Salesforce organizations and integrated applications, applying business analysis to identify root causes and recommend solutions. The role also involves configuring Salesforce tools, testing, documentation, client training, and collaboration on complex service and project work.

No H1B

Responsibilities

Understand clients' needs, as communicated by CSMs and client stakeholders

Assess technical, functional, and process requirements

Apply business analysis to client tickets, identifying root causes and recommending solutions that address the underlying need

Analyze broader business process needs and provide recommendations for improvement beyond individual tickets

Collaborate with Client Success Managers, Consultants, Technical Consultants, and fellow Technical Analysts across the services team to solution complex or cross-functional requests

Monitor client ticket queues and work to resolve issues promptly

Provide concise status updates on tickets

Configure Salesforce-based tools and technology per requirements, with growing exposure to other platforms across clients' technology ecosystems

Conduct testing and track issues and their resolution

Contribute to project and build work as capacity, interest, and client needs allow

Lead client trainings to support adoption of CTG-delivered solutions

Create business process documentation and contribute to the Craftsman knowledge base

Communicate clearly and professionally in verbal and written situations

Responsibilities, expectations, and priorities may evolve over time to reflect the changing needs of the firm and our clients
