Cover letter

Craftsman Technology Group - Technical Analyst (Salesforce)

Job URL

Dear Hiring Manager,

Craftsman Technology Group's commitment to delivering tailored Salesforce solutions for nonprofit and public sector organizations aligns closely with my 7+ years of Salesforce experience in administration, configuration, and client-focused support. I have substantial expertise troubleshooting complex Salesforce environments, configuring Flows and automations, and collaborating with cross-functional teams to translate business requirements into scalable CRM solutions.

At Docker, I resolved diverse Salesforce production issues by integrating effective business analysis with configuration changes and user training, directly improving client adoption and reducing recurring support tickets. Additionally, my experience with nonprofit-focused apps such as FormAssembly and Nintex DocGen, alongside my Salesforce Certified Administrator credential, positions me well to support CTG's complex client environments.

I am adept at leading client training sessions and creating clear documentation, essential for fostering technology adoption and continuous improvement. My commitment to leveraging AI tools like Claude to enhance ticket triage and accelerate issue resolution reflects my enthusiasm for integrating emerging technologies into practical workflows.

I am confident my blend of technical Salesforce skills, nonprofit sector awareness, and collaborative problem-solving will translate seamlessly to the Technical Analyst role at Craftsman Technology Group, supporting your mission-driven clients with impactful technology solutions.

Thank you for your consideration.

Sincerely,
Triet Le
