Job description

CrossCountry Consulting - Salesforce Senior Business Analyst

Job URL

Salesforce Senior Business Analyst

CrossCountry Consulting is an advisory firm providing solutions across accounting and risk, technology-enabled transformation, and transactions. The Senior Salesforce Business Analyst will independently lead business analysis activities for Salesforce implementations, manage client relationships, translate business needs into functional requirements, and mentor junior team members from discovery through deployment.

Growth Opportunities

H1B Sponsor Likely

Responsibilities

Independently lead and facilitate discovery sessions, workshops, backlog grooming, sprint planning meetings, and stakeholder interviews to gather, validate, and prioritize business requirements

Build and manage strong client relationships, establishing trust with new clients and serving as a reliable point of contact throughout the project lifecycle

Partner with clients to understand business goals, identify gaps, risks, and considerations, and translate complex needs into clear user stories, process flows, and functional specifications

Act as the key liaison between developers, Salesforce configurators, and non-technical stakeholders, ensuring requirements are accurately understood and delivered across workstreams

Apply a user-centric mindset to requirements-gathering, documentation, QA support, and training activities to ensure solutions meet real business needs

Analyze complex business processes and break them down into smaller, manageable, and actionable requirements across the full project lifecycle — from discovery through deployment

Maintain and prioritize the product backlog, working with technical teams to refine user stories and define clear acceptance criteria

Support system integrations by identifying business needs and facilitating collaboration between client stakeholders and technical teams

Mentor and guide junior Business Analysts, sharing best practices and supporting their professional development

Contribute to the development and delivery of client-facing deliverables, including process documentation, training materials, and status reports, with strong attention to detail

Evaluate and escalate project issues, risks, or conflicts proactively, offering thoughtful suggestions to ensure smooth project execution

Leverage firm-approved AI tools — including emerging platforms — to support efficiency, quality, and innovation in the role, in accordance with company policies on data protection, intellectual property, and professional standards

Stay informed about emerging AI tools and techniques and collaborate with firm leadership to identify compliant opportunities to enhance client solutions and internal processes

Required

5–8 years of experience in a Salesforce consulting firm or professional services environment, supporting Salesforce implementation projects in a Business Analyst role

Proven ability to independently drive client-facing meetings, including discovery sessions, backlog grooming, and sprint planning — with minimal oversight

Strong client management skills, including the ability to establish and grow new client relationships from the ground up

Excellent ability to liaise between developers and non-technical stakeholders, with the ability to translate technical concepts for business audiences and vice versa

Solid understanding of the Salesforce platform, including core objects, the data model, and key product areas such as Sales Cloud, Service Cloud, and/or Experience Cloud — without the need for hands-on configuration expertise

Demonstrated critical thinking skills, including the ability to validate requirements and proactively surface gaps, risks, and considerations

Experience facilitating requirements-gathering sessions and translating business needs into user stories, process flows, and functional documentation

Strong familiarity with Agile/Scrum methodologies and project management practices

Well-organized, results-driven, and comfortable working in a fast-paced consulting environment across multiple client engagements simultaneously

Excellent organizational, verbal, presentation and facilitation, and written communication skills — both internally and with clients

Demonstrated ability to responsibly explore and adopt firm-approved AI tools, including AWS-native tools such as Amazon Q, to enhance productivity and innovation

Openness to learning and applying emerging technologies, including AI and automation, in alignment with firm policies and client standards

Bachelor's degree from an accredited university, or equivalent work experience

Experience in a consulting or professional services environment is required

Preferred

Prior experience mentoring or leading junior team members is preferred

Benefits

Comprehensive healthcare options, including medical, dental, and vision coverage

Flexible spending accounts

A 401(k) with company matching

Generous parental and maternity leave policies

Technology stipends

Wellness reimbursement programs
