CrossCountry Consulting - Salesforce Senior Business Analyst

Job URL

Dear Hiring Manager,

With over seven years of progressive experience in Salesforce consulting and a proven track record in business analysis, I am enthusiastic about contributing as a Senior Salesforce Business Analyst at CrossCountry Consulting. My expertise lies in leading client-facing discovery sessions, backlog grooming, sprint planning, and translating complex business challenges into clear, actionable user stories and functional specifications aligned to Sales Cloud, Service Cloud, and Experience Cloud.

At Docker, I independently drove discovery and requirements activities that built strong client relationships and delivered scalable Salesforce solutions. I mentored junior analysts and leveraged AI tools like Amazon Q to enhance process efficiency and solution quality. At AWS, I facilitated workshops with stakeholders translating healthcare and enterprise business needs into prioritized backlogs, supporting smooth Agile delivery and integration requirements.

My strong communication skills and ability to bridge technical and non-technical teams naturally position me to excel in client relationship management and cross-team collaboration at CrossCountry. These experiences are complemented by deep Salesforce platform knowledge, critical thinking to identify risks and gaps, and a results-oriented mindset critical to fast-paced consulting environments.

I am excited about the opportunity to apply my skills toward delivering exceptional Salesforce implementations for your clients.

Sincerely,
Triet Le
