PROFESSIONAL EXPERIENCE

Docker, Inc | *Senior Salesforce Business Analyst*

Dec 2024 - Present | Seattle, Washington, United States

- Led discovery sessions and stakeholder interviews to gather and validate Salesforce requirements across multiple workstreams and business units.
- Managed product backlog, prioritized user stories, and defined clear acceptance criteria collaborating closely with Salesforce developers and administrators.
- Partnered with business stakeholders to identify process gaps, risks, and technical considerations ensuring user-centric and scalable Salesforce solutions.
- Translated complex business needs into detailed process flows and functional documentation supporting Sales Cloud, Service Cloud, and Experience Cloud implementations.
- Built and maintained strong client relationships, acting as trusted point of contact throughout the project lifecycle and mitigating risks proactively.
- Mentored junior business analysts, sharing best practices on agile ceremonies, requirements elicitation, and stakeholder communication.
- Facilitated sprint planning, backlog refinement, and grooming sessions to align cross-functional teams on priorities and deliverables.

- Supported QA activities, ensuring test cases aligned precisely to acceptance criteria and business requirements for Salesforce deployments.
- Produced comprehensive client-facing deliverables such as process maps, training materials, and detailed status reports with high attention to detail.
- Monitored project risks and issues, escalating with recommendations for resolution and process improvement to maintain smooth execution.
- Collaborated with technical teams to support system integrations using Salesforce APIs and data model knowledge, improving solution interoperability.
- Leveraged firm-approved artificial intelligence tools including Amazon Q to enhance requirement quality and business analysis efficiency.

Amazon Web Services (AWS) | *Senior Salesforce Business Analyst*

Jul 2023 - Dec 2024 | Seattle, Washington, United States

- Independently led backlog grooming, sprint planning, and discovery workshops for Salesforce Sales Cloud and Service Cloud projects under Agile methodologies.
- Built strong trust with new and existing clients through transparent communication and thorough understanding of business goals and risks.
- Collaborated with developers and non-technical stakeholders translating requirements into user stories, acceptance criteria, and functional documentation.
- Analyzed business processes to identify inefficiencies and propose actionable Salesforce configurations aligned to business needs and compliance.
- Supported Experience Cloud projects by defining user journeys, security parameters, and functional specifications for improved self-service capabilities.
- Engaged in client meetings to document complex system integrations requirements facilitating alignment between technical teams and business users.
- Mentored junior analysts providing coaching to improve requirements gathering, stakeholder engagement, and Agile ceremony participation.
- Delivered detailed process flows, training guides, and project status reports helping clients understand impact and adoption strategies.
- Applied AWS native AI tools such as Amazon Q under firm policies to optimize efficiency in requirements validation and documentation.

Amazon Web Services (AWS) | *Salesforce Business Analyst*

Oct 2021 - Jul 2023 | Seattle, Washington, United States

- Facilitated business analysis and requirements gathering sessions for Salesforce Service Cloud configurations supporting healthcare payer processes.
- Drafted user stories and process documentation translating complex billing and member service workflows into actionable development tasks.
- Supported product backlog prioritization with project managers and product owners ensuring clear sprint objectives and acceptance criteria.
- Engaged with developers and architects to clarify requirements and resolve implementation questions across Salesforce and MuleSoft integration workstreams.
- Produced user-centric process flows and functional documents fostering shared understanding and minimized rework during implementation.

- Collaborated with QA teams providing subject matter expertise and validating acceptance tests against business requirements.
- Tracked project risks and issues, reported status to client leadership, and proposed mitigation strategies proactively.
- Supported training efforts by developing materials aligned to approved Salesforce feature implementations improving user adoption.
- Participated in Agile ceremonies and contributed to continuous process improvements enhancing delivery quality and team collaboration.

Deloitte Consulting | *Salesforce Business Analyst*

Feb 2019 - Sep 2021 | Gilbert, Arizona, United States

- Supported multiple Salesforce implementation projects within healthcare and insurance domains, focusing on requirements gathering and stakeholder collaboration.
- Conducted workshops and facilitated cross-functional meetings to elicit business needs, document requirements, and clarify project scope.
- Transformed complex business processes into user stories, use cases, and process flows to guide Salesforce configurators and developers.
- Maintained product backlogs and worked with scrum teams to prioritize sprint deliverables aligned to client business objectives.
- Developed training materials and process documentation improving stakeholders' understanding and supporting change management activities.
- Assisted in client risk assessments by proactively identifying requirements gaps, dependencies, and potential project impacts.
- Collaborated with technical leads ensuring Salesforce solutions met compliance needs and followed best practices for security and data governance.
