Job description

ECI Software Solutions - GTM Engineer, Pre-Sales

Job URL

GTM Engineer, Pre-Sales

ECI Software Solutions is seeking a GTM Engineer, Pre-Sales to build and operate the technology layer supporting its sales and customer lifecycle processes. The role focuses on automating lead routing, account assignment, pipeline progression, revenue intelligence, integrations, and AI-assisted selling while partnering with Sales, Marketing, and Operations leaders.

Enterprise SoftwareSaaSCRMEnterprise Resource Planning (ERP)

No H1B

Responsibilities

Build the sales operating platform. Design the automation, workflows, and AI capabilities that manage lead routing, enrichment, account assignment, territory management, and pipeline progression across the sales lifecycle

Improve seller productivity. You'll partner directly with Sales, Marketing, and Operations leaders to identify operational bottlenecks, prioritize opportunities, and deliver solutions that become part of how the business operates every day

Build revenue intelligence. Develop signal intelligence, scoring models, and next-best-action capabilities that help teams prioritize opportunities and engage buyers more effectively

Connect the technology stack. Design and maintain integrations across Salesforce, marketing automation, AI platforms, data providers, and sales engagement tools to ensure information flows reliably throughout the revenue engine

Advance AI capabilities. Evaluate emerging sales technologies, operationalize successful pilots, and help define where AI creates meaningful leverage across the pre-sales organization
