Cover letter

ECI Software Solutions - GTM Engineer, Pre-Sales

Job URL

Dear Hiring Manager,

I am excited to apply for the GTM Engineer, Pre-Sales role at ECI Software Solutions. Your need for a technologist who can build and operate scalable sales platforms, automating lead routing, pipeline progression, and embedding AI-assisted selling technology resonates deeply with my background.

With over seven years as a Senior Salesforce Developer and GTM Engineer, I have designed and implemented complex automation workflows, omni-channel integrations, and AI-driven revenue intelligence solutions that increase seller productivity. At Docker, I led the development of OmniStudio sales workflows, AI-powered case triage, and API-driven integrations unifying sales engagement tools, which reduced automation failures by 20% and improved team efficiency dramatically.

At AWS, I successfully automated lead routing processes handling 1,500+ monthly leads via Chili Piper and integrated forecasting tools to enhance pipeline visibility, directly increasing qualified meeting bookings by 10%. I have deep expertise building secure, scalable Salesforce architectures and partner closely with Sales, Marketing, and Operations to translate business challenges into sustainable technical solutions.

My hands-on experience with Salesforce platform development, API integration, AI-assisted workflows, and sales operations tools position me to immediately impact ECI’s revenue engine modernization initiatives and advance AI capabilities pragmatically.

Thank you for considering my application. I look forward to contributing to your team’s success.

Sincerely,
Triet Le
