Cover letter

ELYON International - Salesforce Solutions Architect

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Solutions Architect position for the federal healthcare modernization program at ELYON International. This role's central challenge is leading scalable, secure Salesforce architectures that integrate across multiple complex systems while ensuring compliance with federal healthcare regulations and modernization goals.

With over seven years of progressive Salesforce expertise including five years in architectural leadership, I have designed and delivered enterprise Salesforce solutions for cloud-based healthcare and technology enterprises. I have led the design of platform strategies, integration architectures using REST APIs and event-driven models, and data governance frameworks aligned with HIPAA and federal security standards. Notably, I architected OmniStudio-enabled guided workflows and Experience Cloud portals that improved client engagement and reduced support overhead by 20%.

My experience at AWS and Docker includes mentoring technical teams, conducting architecture reviews, and driving Agile delivery processes to ensure quality and compliance. I hold Salesforce Application Architect credentials, which underscore my capability to guide technical solutions safely in regulated environments.

I am confident my blend of technical leadership, healthcare industry knowledge, and cloud integration skills position me to address ELYON's modernization objectives effectively. I look forward to the opportunity to contribute to your team's success.

Sincerely,
Triet Le
