Cover letter

Edgewater Federal Solutions, Inc. - Senior Oracle APEX Developer

Job URL

Dear Hiring Manager,

Edgewater Federal Solutions requires a Senior Oracle APEX Developer to design and develop mission-critical software applications with expertise in Oracle APEX, PL/SQL, and REST API integrations. With over 7 years' proven experience in enterprise software development, I have successfully led Oracle APEX projects incorporating complex PL/SQL coding and implemented secure RESTful integrations, directly aligning with your requirement for robust application and integration development.

At Docker, Inc, I architected high-performance Oracle APEX applications featuring reusable components and JavaScript enhancements that improved user workflows by 25%. I also developed REST API integrations automating data exchange processes, resulting in a 30% reduction in manual tasks. My experience producing comprehensive design documents, flowcharts, and adhering to stringent security guidelines demonstrates my readiness to support DOE clearance environments.

My strong skill set in PL/SQL, REST API design, and JavaScript integration perfectly matches the technical demands of this role. Moreover, my history of leading cross-team collaborations and mentoring developers ensures effective delivery and ongoing support of software systems at scale. I am confident that my background and proactive problem-solving approach will translate effectively into advancing Edgewater Federal Solutions' mission requirements.

Thank you for considering my application. I look forward to discussing how I can contribute to your team's success.
