Job description

Evidence In Motion (EIM) - Salesforce Developer Administrator

Job URL

Salesforce Developer Administrator

Evidence in Motion is seeking a Salesforce Developer Administrator to support its business enablement operations. The role focuses on administering, maintaining, integrating, and continuously improving Salesforce Education Cloud, Marketing Cloud, and related systems while collaborating with Enrollment, Marketing, Clinical Education, and Post Professional Services teams.

ConsultingEducationContinuing Education

H1B Sponsor Likely

Responsibilities

Evaluate, analyze, and maintain all of EIM Salesforce instances; serve as a liaison between technical teams and business stakeholders

Collaborate with stakeholders to gather requirements, analyze business processes, and identify gaps or necessary changes in existing solutions

Develop and maintain custom solutions using Apex Classes, Triggers, Flows and Lightning Web Components (LWC)

Define project scope, objectives, and feasibility; modify and configure CRM systems to align with business needs and stakeholder requirements

Develop and execute test plans and validation of related IT solutions, as well as other quality assurance measures; lead testing such as user acceptance, performance, security, usability, etc

Manage vendor relationships, working on bug fixes, new features, and optimal product usage

Deliver training, demonstrations, and regular communications to end-users, and provide ongoing support to ensure smooth system adoption

Create and maintain comprehensive documentation, including process maps, system architecture, and organizational structures

Stay up to date with Salesforce releases and best practices, contributing to change management efforts for seamless solution transitions
