Evidence In Motion (EIM) - Salesforce Developer Administrator

Job URL

Dear Hiring Manager,

Evidence in Motion's Salesforce Developer Administrator role requires deep expertise in administering and developing Salesforce Education Cloud solutions integrated with Omni-Channel and Amazon Connect call centers, as well as proficiency with Zoom Phone/Webinar and Canvas LMS integrations. With over seven years of senior Salesforce development experience, I bring hands-on skills in Apex, Lightning Web Components, Flows, Omni-Channel configuration, and robust Salesforce integration architectures, aligning with your need for a solution-driven technologist.

At Docker and AWS, I led Salesforce Education Cloud implementations and administered Omni-Channel with Amazon Connect, successfully optimizing call center routing and automation workflows. I architected seamless integrations with Zoom Phone/Webinar and Canvas LMS using REST APIs and OAuth, delivering improved platform adoption and business efficiency. My experience managing vendor relationships, leading UAT and performance testing, and producing comprehensive documentation equips me to excel in maintaining and enhancing your Salesforce ecosystem.

My higher education domain experience and proven ability to gather and translate complex stakeholder requirements into maintainable Salesforce solutions make my background a natural fit for Evidence in Motion's collaborative environment. I am confident my skill set will support your digital transformation goals while enabling smooth, scalable CRM operations.

Thank you for considering my application.

Sincerely,
Triet Le
