First Citizens Bank - Senior Salesforce Developer (Remote)

Job URL

Dear Hiring Manager,

First Citizens Bank requires a seasoned Senior Salesforce Developer to architect and implement robust Financial Services Cloud solutions and integrations with core banking systems. With over seven years of Salesforce development experience and deep expertise in Apex, Lightning Web Components, MuleSoft Anypoint Platform, and REST/SOAP APIs, I am well-prepared to meet these challenges effectively.

At Docker, I designed scalable Salesforce Financial Services Cloud workflows and led MuleSoft API integrations with banking and insurance platforms, improving operational efficiency and data synchronization. At AWS, I architected API-led connectivity solutions to unify enterprise Salesforce implementations, handled complex data migrations, and supported CI/CD release management. My efforts facilitated 20% reduction in manual errors and improved platform stability significantly.

My proven ability to collaborate across cross-functional teams, manage production issue triage, and enforce security and compliance best practices will translate seamlessly to your environment. I am confident my in-depth knowledge of financial services Salesforce deployments and integration expertise will deliver measurable business value for First Citizens Bank.

Thank you for considering my application.

Sincerely,
Triet Le
