Job description

GAF - IT Senior Business Analyst - Salesforce

Job URL

IT Senior Business Analyst - Salesforce

GAF is seeking an IT Senior Business Analyst to lead complex requirements gathering, process design, and functional strategy across its Salesforce and Analytics platforms. The role focuses on optimizing Lead-to-Cash processes, defining Salesforce solutions, modernizing Tableau and Slack workflows, leading user acceptance testing, and mentoring junior Business Analysts.

ConstructionManufacturingReal EstateBuilding MaterialCommercialResidential

No H1B

Responsibilities

Lead discovery workshops, interviews, and process design sessions across cross-functional business units

Author sophisticated user stories, functional spec documents, process swim-lane diagrams, and UX wireframes for audiences ranging from offshore developers to C-Level executives

Define solution architectures across Sales Cloud, Service Cloud, Experience Cloud, and Data Cloud

Modernize enterprise reporting by establishing requirements for Tableau (including metric-driven analytics via Tableau Pulse) and integrated Slack conversational workflows

Evaluate custom vs. declarative configurations in Salesforce Flow Builder to protect system scalability

Collaborate with onshore/offshore development and QA teams to validate technical deliverables against business logic

Lead User Acceptance Testing (UAT), script creation, execution, and stakeholder sign-offs

Provide functional direction and review guidance to junior Business Analysts

Support IT governance, release management strategies across seasonal Salesforce updates, and operational support
