GAF - IT Senior Business Analyst - Salesforce

Job URL

Dear Hiring Manager,

I am excited to apply for the IT Senior Business Analyst position focused on Salesforce and Analytics platforms at GAF. With over seven years of experience leading Salesforce-driven business process analysis and solution design, I have successfully optimized Lead-to-Cash workflows and modernized enterprise reporting using Tableau and Slack integrations.

At Docker and Amazon Web Services, I led complex cross-functional workshops, authored comprehensive user stories and process diagrams, and defined Salesforce solutions across Sales, Service, Experience, and Data Clouds. I have direct experience implementing Salesforce security models—OWDs, Sharing Rules, Permission Sets—and balancing declarative and custom development to ensure scalable, maintainable platforms.

I have led user acceptance testing efforts, collaborating closely with onshore and offshore teams to validate deliverables and improve deployment quality. My proficiency with Agile methodologies, Jira, DevOps tools (Copado, AutoRABIT), and visual modeling (Lucidchart, Miro) supports efficient, transparent project execution.

Given my technical background and successful track record driving Lead-to-Cash implementations in enterprise manufacturing and supply chain environments, I am confident my skills align closely with GAF’s needs. I look forward to the opportunity to contribute to your team’s success.

Thank you for your consideration.

Sincerely,
Triet Le
