Job description

HIKE2 - Salesforce Omnistudio Solution Architect

Job URL

Salesforce Omnistudio Solution Architect

HIKE2 is a business transformation partner that helps organizations navigate complex change and build capabilities through business advisory, design, data, AI, technology, engineering, and change expertise. The Salesforce Omnistudio Solution Architect will design scalable Salesforce solutions using OmniStudio, translate business requirements into technical architectures, advise clients, and provide technical leadership throughout implementation projects.

Professional ServicesConsultingEducationAdviceManagement ConsultingTraining

Responsibilities

Lead the architecture and design of complex Salesforce solutions using OmniStudio and Salesforce platform capabilities

Design and implement solutions using OmniStudio tools, including FlexCards, OmniScripts, DataRaptors, Integration Procedures, and related technologies

Translate business requirements into scalable, secure, high-performing technical architectures

Serve as a technical leader and trusted advisor for clients throughout the implementation lifecycle

Collaborate with business analysts, Salesforce developers, project managers, and client stakeholders to define solution strategies

Conduct technical discovery sessions and participate in requirements gathering, solution design, and architecture reviews

Develop solution architecture documentation, technical specifications, integration designs, and implementation standards

Design integrations between Salesforce and external systems using APIs, middleware, and Salesforce integration technologies

Ensure solutions follow Salesforce best practices for scalability, security, performance, maintainability, and data integrity

Provide technical leadership and mentorship to Salesforce developers and consultants

Review proposed solutions and code to ensure alignment with architectural standards and business requirements

Identify technical risks, dependencies, and opportunities for optimization throughout the project lifecycle

Stay current with Salesforce platform innovations, OmniStudio capabilities, and emerging Salesforce technologies

Contribute to internal Salesforce methodologies, reusable assets, accelerators, and best practices

Support pre-sales activities, including solution demonstrations, technical discovery, estimates, proposals, and client presentations when needed
