Job description

Health-E Commerce - Salesforce Commerce Cloud (SFCC) Full Stack Developer

Job URL

Salesforce Commerce Cloud (SFCC) Full Stack Developer

Health-E Commerce is hiring a Salesforce Commerce Cloud Full Stack Developer to support its telehealth e-commerce platform. The role owns front-end development and back-end architecture, builds integrations across commerce and telehealth systems, optimizes platform performance, and collaborates with internal teams and external agencies while mentoring junior engineers.

E-CommerceHealthcareWellnessHealth Care

Comp. & Benefits

H1B Sponsor Likely

Responsibilities

Design and develop features across the Salesforce Commerce stack — Builder.io CMS, Cloudflare Workers, and other 3rd party integrations

Make engineering decisions for Telehealth systems and how they all work together. Make architectural recommendations working with our Architect and Senior Engineering Leadership

Build and maintain custom integrations, and integrate third-party cartridges with necessary customizations to enable future Telehealth expansion

Solve problems that span UI, business logic, and system integration

Translate Sketch/Photoshop/Figma designs into pixel-perfect, cross-browser, responsive builds that leverage Builder.io

Own front-end performance optimization (load time, rendering, asset delivery)

Apply JavaScript patterns (MVVM, AMD/CommonJS) using React, ISML, and SASS

Set up, maintain, and troubleshoot integration feeds between SFCC, SOM, TeleHealth Middle Layer

Also have ability to set up, maintain, and troubleshoot integration feeds — products, inventory, price books, OMS, prescription/order data, Google Merchant, product reviews

Manage OCAPI/SCAPI integrations, Cloudflare caching strategy, and cache invalidation

Monitor site performance (uptime, speed) and recommend/implement improvements

Administer Business Manager configurations, site domains, and code repositories

Manage compliance with SFCC platform requirements and release cycles

Partner with external agencies, third-party vendors, and internal teams (product, clinical ops, marketing, data) to deliver end-to-end commerce capabilities

Identify project risks early and drive mitigation

Mentor junior engineers
