Job description

Hyster-Yale Materials Handling - Salesforce Technical Architect

Job URL

Salesforce Technical Architect

Hyster-Yale Materials Handling, Inc. is a global manufacturer of industrial lift trucks and materials-handling solutions. The company is seeking a Salesforce Technical Architect to lead the architecture, design, and delivery of enterprise-scale Salesforce solutions, including integrations, data migrations, enhancements, and platform improvements. The role also provides architectural governance, stakeholder guidance, technical documentation, and support for secure, scalable CRM capabilities.

Responsibilities

Partner with business leaders, product owners, and IT teams to understand day-to-day needs and translate them into practical Salesforce solutions

Design and guide Salesforce solutions across Sales Cloud, Service Cloud, Experience Cloud, Manufacturing Cloud, and the broader Salesforce Platform

Lead architecture discussions, review solution designs, and ensure work aligns with enterprise standards, security requirements, and platform best practices

Support the delivery of Salesforce enhancements, integrations, data migrations, and system improvements from planning through implementation

Collaborate with developers, administrators, architects, vendors, and external partners to troubleshoot issues and deliver reliable CRM capabilities

Create and maintain architecture documentation, technical designs, roadmaps, and implementation guidance to support consistent delivery

Identify opportunities to improve platform performance, reduce technical debt, strengthen security, and expand Salesforce capabilities across the organization
