Triet Le

Salesforce Technical Architect

Chandler, AZ, United States | +1(602) 825-3683 | trietle1997@outlook.com | LinkedIn

SUMMARY

Salesforce Technical Architect with over 10 years in Salesforce platforms including 7+ years architecting enterprise-scale CRM solutions across Sales, Service, Experience, and Manufacturing Clouds. Proven expertise in designing scalable, secure, and maintainable solutions supporting global, multi-region deployments. Skilled in Apex, LWC, Visualforce, Salesforce Flow, REST/SOAP APIs, integrations, and security architecture, ensuring compliance with best practices. Strong stakeholder management and Agile delivery experience, driving end-to-end project success including data migrations and platform enhancements. Experienced in platform governance, CI/CD pipelines, and reducing technical debt while optimizing performance. Adept at translating complex business needs into technical architecture and leading cross-functional teams to deliver high-quality Salesforce solutions aligned with enterprise standards.

SKILLS

Salesforce Clouds & Platforms: Sales Cloud, Service Cloud, Experience Cloud, Manufacturing Cloud, Revenue Cloud (CPQ), Salesforce Data Cloud, OmniStudio

Development & Automation: Apex, Lightning Web Components (LWC), Visualforce, Salesforce Flow (Screen, Record-Triggered), Batch Apex, Queueable Apex, Async Apex

Integration & APIs: REST API, SOAP API, Apex Callouts, Named Credentials, OAuth 2.0, Event-Driven Architecture (Platform Events, Change Data Capture), Middleware Integration Patterns

Architecture & Security: Salesforce Certified Application Architect, Sharing & Visibility Models, Permission Sets, Security Architecture, Single Sign-On (SSO), Data Architecture, Platform Scalability, Secure Access Models

DevOps & Delivery: Salesforce DX, CI/CD Pipelines, Metadata API, Scratch Orgs, Sandboxes, Release Management, Agile Methodologies, Backlog Refinement, Architecture Governance

Stakeholder Management & Documentation: Technical Architecture Documentation, Roadmaps, Governance, Cross-Team Collaboration, Vendor Management, Business Requirements Translation

Tools & Technologies: Git, VS Code, Postman, Jira, Confluence, Salesforce Inspector, Data Loader, JSON, SOQL, SQL

PROFESSIONAL EXPERIENCE

Docker, Inc | *Senior Salesforce Developer*

Dec 2024 - Present | Seattle, Washington, United States

- Led architecture and design for scalable Salesforce OmniStudio and Lightning Web Component solutions supporting complex guided workflows and integrations.
- Developed secure API-driven integrations using REST, Named Credentials, OAuth 2.0, and Platform Events to connect Salesforce with external SaaS systems.
- Engineered batch and queueable Apex processes to handle over 250,000 monthly records with improved error handling and performance optimizations.
- Implemented least-privilege access models using sharing rules, permission sets, and Apex security enforcing CRUD/FLS, reducing access support tickets by 15%.

- Created and maintained architecture documentation, technical designs, and roadmaps to guide platform enhancements and ensure adherence to enterprise standards.
- Collaborated with cross-functional teams to troubleshoot production issues involving governor limits, integration failures, record locking, and API authentication.
- Modernized legacy automation by replacing Workflow Rules and Process Builder with scalable Salesforce Flow solutions, improving maintainability and performance.
- Supported Experience Cloud portals with secure, permission-based access, enhancing customer and partner self-service capabilities and case visibility.
- Contributed to Salesforce AI and Agentforce implementation by designing data models and workflows aligned with agent-assist use cases and knowledge integration.
- Owned release support by evaluating new Salesforce features, testing, deployment coordination, and impact documentation ensuring smooth delivery of platform improvements.
- Led integration efforts with Gong and Revenue.io for call transcription and analytics, automating activity capture and enhancing sales coaching workflows.
- Drove improvements to platform security and technical debt reduction initiatives fostering long-term platform stability and scalability.

Amazon Web Services (AWS) | *Senior Salesforce Developer*

Jul 2023 - Dec 2024 | Seattle, Washington, United States

- Architected and developed enterprise Salesforce solutions supporting Sales Cloud, Service Cloud, and Experience Cloud in a HIPAA-compliant healthcare environment.
- Designed and implemented Salesforce integrations using REST/SOAP APIs, Apex callouts, OAuth, Named Credentials, and asynchronous event-driven architecture.
- Managed security model configuration through profiles, permission sets, sharing rules, and field-level security to meet enterprise compliance and governance standards.
- Led Salesforce Flow automation to optimize case intake, ticket assignment, and escalation processes enhancing service team efficiency and SLA compliance.
- Created Experience Cloud portals enabling secure customer interactions with case management, knowledge articles, and file uploads, decreasing email support volumes by 20%.
- Developed OmniStudio components including OmniScripts and DataRaptors to streamline guided customer workflows and service request automation.
- Conducted architecture reviews on governor limits, API use, transaction boundaries, and platform scalability ensuring solution robustness and performance.
- Implemented multi-channel engagement workflows using Groove, capturing activities across calls, emails, and meetings for improved sales productivity and reporting.
- Integrated scheduling solutions (Chili Piper) and forecasting tools (Aviso) with Salesforce, leading to a 10% increase in qualified meeting bookings and streamlined forecasting.

Amazon Web Services (AWS) | *Salesforce Developer*

Oct 2021 - Jul 2023 | Seattle, Washington, United States

- Developed Apex REST services and multi-protocol Salesforce integrations supporting billing and subscription management through REST and SOAP APIs.
- Implemented event-driven patterns using Platform Events and Change Data Capture to reduce coupling and enhance integration resiliency.

- Built FlexCards and Lightning UI components with role-based visibility for enhanced user-centric case and customer data presentation.
- Supported architectural design decisions through collaboration with architects and stakeholders focusing on integration patterns and maintainability.
- Contributed to Agile development including backlog grooming, code review, automated testing, and release management ensuring high-quality deliverables.
- Managed Salesforce admin tasks including security reviews, workflow optimization, and user support to maintain CRM stability and performance.
- Supported Salesloft integration enhancing sales engagement cadence and CRM data sync for 65 users, improving outreach effectiveness.

Deloitte Consulting | *Salesforce Developer*

Feb 2019 - Sep 2021 | Gilbert, Arizona, United States

- Participated in enterprise healthcare CRM implementations with Salesforce Sales and Service Clouds, focusing on member workflows and HIPAA compliance.
- Developed Apex triggers, Visualforce, Lightning Components, validation rules, and workflow automation to support business processes and regulatory requirements.
- Configured security profiles, permission sets, role hierarchies, and sharing rules to enforce strict data access and compliance controls.
- Performed data quality initiatives including deduplication, field validations, and cleanup improving CRM data reliability.
- Maintained deployment artifacts, performed unit testing, and documented application configurations to support repeatable release processes.
- Enhanced proposal processes by integrating and managing PandaDoc templates and Salesforce field mappings decreasing document prep time by over 35%.
- Produced technical and functional documentation supporting audit readiness and traceability in regulated environments.

Arizona State University - W. P. Carey School of Business | *IT Support Specialist*

Jun 2016 - Dec 2018 | Tempe, Arizona, United States

- Provided enterprise IT support and troubleshooting services for 200+ faculty and staff, identifying and removing security threats.
- Collaborated on Agile solutions to optimize enterprise technology problems and improve service delivery.

EY | *Risk Advisory Intern*

Jun 2018 - Aug 2018 | Greater Phoenix Area

- Reviewed IT documentation and assessed technology risks for Fortune 500 clients, identifying control deficiencies and compliance gaps.
- Executed detailed walkthroughs and supported testing processes contributing to risk mitigation and audit effectiveness.

CERTIFICATIONS

- Salesforce Certified Application Architect
- Salesforce Certified Platform Developer II
- Salesforce Certified Data Architecture & Management Designer

- Salesforce Certified Sharing and Visibility Designer
- Salesforce Certified Platform Developer I
- Salesforce Certified Administrator
- Vlocity Platform Developer

EDUCATION

W. P. Carey School of Business - Arizona State University 2015 - 2018

Bachelor of Science (B.S.), Business Analytics

Bachelor's Degree, Computer and Information Systems Security/Information Assurance
