Job description

Lattice Semiconductor - Salesforce Applications Solutions Architect

Job URL

Salesforce Applications Solutions Architect

Lattice Semiconductor is a global developer of programmable logic and power management solutions. The company is seeking a Salesforce Applications Solutions Architect to translate complex revenue and sales process requirements into scalable Salesforce architectures and lead the Oracle CX to Salesforce migration initiative. The role partners with business stakeholders, product owners, and cross-functional delivery teams across the revenue lifecycle.

Artificial Intelligence (AI)Enterprise SoftwareSemiconductorAI InfrastructureField-Programmable Gate Array (FPGA)

Comp. & BenefitsNo H1B

Responsibilities

Designed end-to-end Salesforce solutions and implement them across Sales Cloud, Revenue Cloud, Sales Planning and Compensation management

Designed and documented data models, integration patterns, and system interfaces between Salesforce and other enterprise systems. Used AI tools to achieve the same

Collaborated with business stakeholders, product owners, and technical teams to define and prioritize Customer Experience (CX) related solutions

Conducted impact analysis for new releases and managed technical debt in previous jobs

Familiar with API-based integrations, middleware (MuleSoft, Oracle SOA etc.), and external systems

Proficient in technical skills like Apex, LWC (Lightning Web Components), Aura, Visualforce, and Salesforce Flow
