Cover letter

NuAxis Innovations - Mid-Level Salesforce Developer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Mid-Level Salesforce Developer position at NuAxis Innovations. With over five years of hands-on experience building Apex classes, Lightning Web Components, Salesforce Flows, and API integrations, I am confident in my ability to deliver sprint-level functionality under senior technical guidance in regulated environments.

My prior roles at AWS and Docker involved secure coding practices, Agile delivery, and extensive work with Salesforce declarative automation and integrations — skills directly aligned with the responsibilities outlined in your job posting. I developed and optimized API-based integrations that improved system reliability and performance while adhering to best practices around governor limits and security compliance. I also played a key role in testing, defect resolution, deployment support, and documentation, ensuring solutions are maintainable and production-ready.

One of my accomplishments includes reducing automation failures by 20% through robust Apex batch processing and flow re-architecture, which enhanced platform stability. Additionally, I successfully led integrations using REST APIs and OAuth securing complex data exchanges that supported scalable Salesforce deployments.

My background working in federal and healthcare regulated environments equips me with an understanding of compliance and security requirements necessary for your team. I am enthusiastic about the opportunity to contribute my technical expertise and continue developing Salesforce features that align with NuAxis Innovations' mission to enhance customer experience within government solutions.

Thank you for your consideration.

Sincerely,

Triet Le
