Job description

Onyx Government Services - Senior ETL Developer

Job URL

Senior ETL Developer

Onyx Government Services provides data management, integration, and analysis solutions for government and defense-related organizations. The company is seeking a Senior ETL Developer to design, develop, and maintain scalable ETL/ELT pipelines and dbt-based data transformation workflows for federal data management and advanced analytics projects. The role also involves building data warehouse structures, querying databases, assuring data quality, and troubleshooting ETL solutions.

Big DataGovernmentInformation Technology

Comp. & BenefitsNo H1B

Responsibilities

Design and develop ETL processes

Design, develop, and maintain reliable ETL/ELT data pipelines

Develop and maintain data transformation workflows using dbt

Write complex and optimized SQL queries for data extraction, transformation, and analysis

Build and maintain dbt models, sources, tests, snapshots, and documentation

Convert existing PL/SQL procedures into SSIS packages

Troubleshoot existing ETL solutions

Query Oracle databases for data analysis and data quality assurance
