Job description

Partners In Health - Lead, CRM Administration and Ecosystem

Job URL

Lead, CRM Administration and Ecosystem

Partners In Health is a nonprofit global health organization focused on improving access to quality healthcare for vulnerable communities worldwide. The Lead, CRM Administration and Ecosystem will administer, govern, optimize, and integrate the organization’s CRM ecosystem while leading deployments, security, data governance, system adoption, and technical delivery. The role also supervises a junior administrator and oversees external consultants while collaborating with stakeholders to develop scalable solutions.

Culture & ValuesNo H1B

Responsibilities

Administer and maintain PIH’s CRM ecosystem in an enterprise environment, leading advanced configuration and integration of Salesforce, HubSpot, Blackthorn Events, and Fundraise Up, amongst other systems

Design validation rules, flows and automation within and between these tools to enable a wide range of end-user workflows

Accountable for the design and management of user access, roles, and permission sets across CRM ecosystem tools, utilizing features like Salesforce Shield Event Monitoring

Partner closely with IT leaders to ensure overall platform security, strong data governance, and up-to-date policy

Lead deployments across platforms, environments and processes, while ensuring CRM ecosystem platform stability, scalability, and alignment with enterprise architecture

Maintain knowledge of vendor documentation and system roadmaps, proactively researching and assessing the potential impact or added value of feature releases on end-user workflows, to provide recommendations for their implementation in the broader CRM ecosystem roadmap

Collaborate effectively with team members and business unit stakeholders, through participation in stakeholder discovery, making technical recommendations during sprint planning and backlog refinement, and providing supportive supervision for junior staff and external consultants
