Partners In Health - Lead, CRM Administration and Ecosystem

Job URL

Dear Hiring Manager,

I am excited to apply for the Lead, CRM Administration and Ecosystem role at Partners In Health. With over seven years of experience administering complex Salesforce environments, particularly within healthcare and nonprofit settings, I bring the skills necessary to effectively govern and optimize your CRM ecosystem.

In my current role at Docker, I lead end-to-end Salesforce platform administration, security enforcement using Salesforce Shield Event Monitoring, and integrations across diverse SaaS applications. I have a proven track record delivering scalable automation with Salesforce Flows, Apex, and managing multi-system environments incorporating HubSpot and fundraising tools similar to Fundraise Up and Blackthorn Events.

One notable achievement includes redesigning access controls and permission sets to align with least-privilege security models, reducing access-related incidents by over 15%. Additionally, I spearheaded the migration from legacy workflows to modern flow-based automation, significantly enhancing platform stability and user adoption.

My strong ability to collaborate across departments, mentor junior staff, and coordinate external consultants will ensure smooth deployments and ongoing enhancement of your CRM platforms. I am confident my technical expertise and leadership experience position me well to advance the impactful mission of Partners In Health through your CRM ecosystem.

Thank you for considering my application. I look forward to the opportunity to contribute to your team.
