Job description

SolarWinds - Senior Product Owner, Salesforce CPQ/RCA

Job URL

Senior Product Owner, Salesforce CPQ/RCA

SolarWinds is a people-first company that provides simple, powerful, and secure solutions to help customers accelerate business transformation. The Senior Product Owner will own the Salesforce CPQ roadmap and backlog, lead solution design and agile delivery, and guide modernization toward Salesforce Revenue Cloud. The role partners with Sales, Deal Desk, Finance, and technical teams to improve quote-to-cash processes and platform outcomes.

Responsibilities

Own the CPQ capability roadmap in partnership with the Senior Product Manager, maintaining a multi-quarter view of planned business capability

Define the vision and success measures for your product area, and make prioritization calls that balance business value, risk, technical debt, and platform health

Build and defend business cases for significant CPQ investments, including effort, impact, and trade-off analysis

Contribute to the evaluation, design, and phased rollout of Salesforce Revenue Cloud (RCA) capabilities and the migration path from current-state CPQ

Define and track product KPIs, quote cycle time, quote accuracy, approval turnaround, adoption, and defect rates, and use them to steer the roadmap

Own, prioritize, and groom the CPQ product backlog across enhancements, defects, technical debt, and roadmap initiatives

Write clear, testable user stories with well-defined acceptance criteria, functional detail, and edge-case handling

Lead sprint meetings with the offshore Salesforce development team: grooming, sprint planning, stand-ups, reviews, and retrospectives

Act as the decision-maker for the scrum team, clarifying requirements, resolving ambiguity, and accepting or rejecting completed work

Own release scope and readiness, including regression coverage, deployment planning, and post-release validation

Manage delivery risk proactively and communicate progress, blockers, and changes to stakeholders and IT leadership

Help establish and improve team standards for story writing, design review, and release management

Serve as the senior functional subject matter expert for Salesforce CPQ: product and bundle configuration, price rules, discount schedules, approval workflows, quote templates, contracting, amendments, and renewals

Lead the design of complex CPQ solutions end to end, including data model implications, automation strategy, and integration touchpoints

Document, analyze, and redesign Quote-to-Cash business processes, eliminating friction in the quoting cycle

and reducing manual intervention

Favor configuration and scalable platform capability over one-off customization, and actively drive down accumulated technical debt in the CPQ org

Partner with Deal Desk, Sales Operations, and Finance to strengthen pricing governance, approval hierarchies, and quote accuracy

Assess and coordinate downstream impacts to order management, provisioning, billing, and ERP with adjacent IT teams

Lead structured discovery and design sessions with business leaders and process owners to frame problem statements and quantify business impact

Translate business needs into functional designs and high-level technical specifications the offshore delivery team can build from without rework

Negotiate scope, sequencing, and timelines with stakeholders, communicating trade-offs and the rationale behind prioritization decisions

Operate as the trusted CPQ point of contact across Sales, Channel, Sales Operations, Marketing, and Finance

Represent the CPQ product area in cross-functional planning, architecture, and governance forums

Qualification

Salesforce CPQ (Steelbrick)Salesforce Revenue Cloud (RCA)Apttus/Conga CPQSalesforce Sales CloudAgile/ScrumProduct OwnershipQuote-to-CashCommunication and influence

Required

8-12 years of experience in IT business systems, business analysis, or product ownership supporting enterprise applications

5+ years of hands-on experience with Salesforce CPQ (Steelbrick), Salesforce Revenue Cloud (RCA), and/or Apttus/Conga CPQ

4+ years of working knowledge of Salesforce Sales Cloud, including the core data model, opportunity management, and declarative configuration

4+ years as a Product Owner or equivalent in an agile/scrum environment, with full backlog and roadmap ownership for a product area

Demonstrated experience delivering complex Quote-to-Cash or CPQ solutions in a multi-product, subscription, or channel-heavy environment

Experience leading offshore or distributed development teams through sustained sprint delivery

Experience mentoring or informally leading other product owners, analysts, or administrators

Deep command of CPQ concepts: product rules, pricing models, discounting, approval matrices, quote document generation, contracting, amendments, renewals, and order creation

Ability to own a product area independently, setting direction, making prioritization calls, and being accountable for outcomes rather than tasks

Exceptional requirements and documentation skills, with a track record of specifications that hold up through build, test, and release

Strong analytical judgment, able to trace a quoting problem through configuration, data, automation, and

process to its root cause

Excellent communication and influence skills across senior business stakeholders and technical teams

Comfortable prioritizing and executing across competing demands in a fast-paced, high-visibility environment

Collaborative and self-directed, with the credibility to push back constructively when a request is not the right solution

Curious and adaptable, with active interest in evolving Salesforce capabilities including Revenue Cloud and AI-assisted selling

Bachelor's degree (4-year) in a technical or business field required

Preferred

Exposure to a CPQ platform implementation, migration, or major re-architecture preferred

Salesforce certifications strongly preferred: CPQ Specialist, Administrator, Sales Cloud Consultant, and/or Revenue Cloud
