# Cover letter

TMS, LLC - W2 Hiring | Salesforce Platform Developer | Remote/Lansing, MI

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Platform Developer position at MITMS, LLC. With over 7 years of Salesforce platform development experience, I have a strong track record designing and delivering scalable Apex and Lightning Web Component solutions that align seamlessly with your requirements. My proven expertise includes crafting secure, governor-limit-compliant Apex batch and queueable jobs, building rich user experiences with LWC, and developing secure, reusable integrations using REST and SOAP APIs with Named Credentials and OAuth 2.0.

At Docker, Inc., I developed event-driven integrations leveraging Platform Events and implemented Salesforce DX-based CI/CD deployments to ensure agile and reliable delivery of new features. I improved automation reliability by 20% through bulk-safe Apex and governance compliance, directly translating into reduced production incidents. My deep understanding of Salesforce security models—covering profiles, permission sets, sharing rules, and organization-wide defaults—aligns perfectly with your emphasis on secure deployment practices.

My experience working cross-functionally with stakeholders, translating business requirements into maintainable Salesforce platforms, and providing testing, documentation, and production support will enable me to add immediate value to your team. I am confident that my technical and collaborative skills make me an excellent fit for this role. I look forward to the opportunity to contribute to your Salesforce platform initiatives.

Thank you for your consideration.

Sincerely,
Triet Le
