Cover letter

U.S. Soccer Foundation - Senior Manager, Salesforce & Technology

Job URL

Dear Hiring Manager,

I am excited to apply for the Senior Manager, Salesforce & Technology position at the U.S. Soccer Foundation. With over seven years of progressive experience in Salesforce administration, development, and governance, I am well-equipped to serve as your organization's primary technical lead on Salesforce CRM. My hands-on expertise includes managing multi-department Salesforce environments with strong governance over user access, security, and data quality—skills directly aligned with the Foundation's need for robust platform administration.

At Docker and AWS, I successfully designed and implemented scalable Salesforce automations using Salesforce Flow, Apex, and Lightning Web Components, while spearheading data visualization initiatives using Salesforce Reports, Dashboards, and Tableau. Additionally, I have supported nuanced Marketing Cloud integrations focusing on data synchronization, consent management, and troubleshooting, directly relevant to your marketing operations growth.

I bring proven success in balancing daily administration with long-term strategic roadmap execution, detailed technical documentation, and effective stakeholder communication. My background working in mission-driven organizations and regulated environments has shaped a collaborative approach focused on secure, sustainable solutions that enable business goals.

I am confident my technical and leadership capabilities will advance the U.S. Soccer Foundation’s Salesforce platform maturity, enabling better program delivery and audience engagement. I look forward to discussing how I can contribute to your team.

Sincerely,
Triet Le
