Cover letter

VARITE INC - USA_Developer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce UI/UX Developer role at your company. With over seven years of Salesforce experience, including three years focused on Lightning Web Components (LWC), Aura Framework, and Salesforce Lightning Design System (SLDS), I have successfully designed and implemented intuitive and accessible user interfaces that boost adoption and productivity across Sales Cloud, Service Cloud, and Experience Cloud.

At Docker, Inc, I led front-end development of reusable Lightning components adhering to WCAG accessibility standards and SLDS, improving user engagement by 15% and establishing scalable UI libraries. I also created Figma prototypes and collaborated closely with cross-functional teams using Agile methodologies to ensure seamless delivery of high-quality user experiences.

My technical expertise includes integrating front-end solutions with Apex, SOQL, and REST APIs, ensuring performant and responsive applications across devices and browsers. Additionally, I have actively mentored junior developers and led UI/UX best practices that align directly with your requirements for technical leadership and stakeholder collaboration.

This combination of hands-on Salesforce UI/UX engineering, accessibility compliance, and Agile team leadership positions me well to contribute to your company’s goal of delivering accessible, high-performing Salesforce experiences. I look forward to the opportunity to discuss how my skills can support your team’s success.

Sincerely,
Triet Le
