Growth Opportunities

H1B Sponsor Likely

Responsibilities

Perform advanced Salesforce administration, including user setup, access and security, permissions, troubleshooting, production support, and ongoing platform maintenance

Design and deliver declarative Salesforce solutions using Flow, Lightning pages, Dynamic Forms, validation rules, reports, dashboards, and other platform capabilities

Support platform enhancements and projects through configuration, requirements clarification, testing, release readiness, deployment validation, and post-release support

Execute data loads, corrections, reconciliation, duplicate management, cleanup, and other activities that improve data quality and platform reliability

Troubleshoot platform, workflow, access, and data issues, partnering with Engineering and other technology teams on more complex technical needs

Create and maintain platform documentation, process guides, release communications, job aids, Salesforce Knowledge content, and other user resources

Drive user readiness and adoption through training, guidance, issue resolution, and self-service resources

Identify recurring issues, process gaps, and opportunities to improve platform usability, operational processes, and user experience

Partner across Product, Engineering, Technology, and the business to deliver scalable, maintainable Salesforce solutions and support ongoing platform modernization
