Job description

Yelp - Solutions Engineer, API Integration

Job URL

Solutions Engineer, API Integration

Yelp connects people with local businesses and provides advertising and marketing solutions through an ecosystem of partners and enterprise accounts. The Solutions Engineer will serve as the primary technical resource for Yelp's API ecosystem, managing partner integrations from onboarding through production launch, troubleshooting issues, monitoring integration health, and collaborating with account, product, engineering, and GTM teams.

Responsibilities

Serve as the primary technical resource for Yelp's account teams and their partners — spanning channel partners, enterprises, national brands, and emerging partners — owning the end-to-end API integration process from onboarding intake through production launch

Guide partners through the setup and adoption of Yelp's Leads API, Ads API, Conversions API (CAPI), Reporting API, and Data Ingestion API, ensuring a smooth and efficient onboarding experience

Manage integration onboarding intake — gathering platform details, coordinating test business setup, confirming account configurations, and aligning internal stakeholders before kickoff

Work directly within technical environments to troubleshoot and resolve complex integration issues

Monitor partner integration health using SQL and internal dashboards, identifying adoption gaps, traffic anomalies, and performance issues proactively

Collaborate with GTM leadership to identify technical opportunities, remove blockers, and accelerate API adoption across the partner ecosystem

Act as the voice of the Customer, surfacing recurring technical challenges and client feedback to Yelp's product and engineering teams to help prioritize improvements

Maintain and contribute to internal documentation and integration playbooks to ensure the team can scale its technical support capabilities

API IntegrationOAuth 2.0API AuthenticationRate LimitingWebhooksSQLAdvertising and Marketing APIsZapierWorkatoJavaScriptPythonStakeholder Collaboration

Required

5+ years of relevant experience in Solutions Engineering, Sales Engineering, Solutions Architecture or a similar technical client-facing role

Hands-on experience supporting API integrations, with a strong understanding of OAuth 2.0, API authentication patterns, rate limiting, webhooks, and common integration challenges

Strong communication skills, with the ability to translate complex technical concepts for non-technical stakeholders and collaborate effectively across sales,product and engineering teams

Proven ability to manage multiple partner integrations simultaneously — from large enterprise accounts with dedicated engineering teams to emerging partners with limited technical resources

Comfortable building processes from scratch - our team is still formalizing integration playbooks, tooling, and self-serve workflows, and you'll be shaping them

Preferred

Familiarity with advertising or marketing APIs, particularly those involving reporting, lead management, or campaign management use cases

Exposure to middleware and no-code/low-code integration tools such as Zapier, Workato, or similar platforms

Comfort operating in a startup-like or high-growth environment where processes are still being built

Experience using AI-assisted development tools (e.g., Claude Code, Copilot) to accelerate troubleshooting, documentation, and workflow automation

Experience coding in or working alongside teams using SQL, JavaScript, Python or similar languages

Benefits

Full medical, vision, and dental effective your first day

15 days PTO (accrual begins on date of hire and increases with 2+ years of tenure thereafter)

12 paid holidays, plus one floating holiday

Up to 14 weeks of parental leave

Monthly wellness subsidy

Work from home reimbursement

Flexible spending account

401(k) retirement savings plan

Employee stock purchase plan
