Cover letter

eTeam - Salesforce Developer

Job URL

Dear Hiring Manager,

I am writing to express my interest in the Salesforce Developer position at eTeam. With over 7 years of extensive experience delivering complex Salesforce Sales Cloud and Service Cloud implementations, I have developed deep expertise in force.com platform technologies including Apex, Lightning Web Components, batch Apex, and integration architectures crucial for your technical design and delivery needs.

I have successfully led and contributed to more than 10 full lifecycle Salesforce implementations with significant customizations for large enterprise clients. In my recent role at Docker, Inc, I designed and delivered scalable, maintainable Lightning component frameworks and event-driven asynchronous Apex solutions that improved system performance and reduced automation failures by 20%. Moreover, my experience integrating Salesforce with ERP systems such as SAP and Oracle using REST and SOAP APIs, combined with proficiency in DevOps tools like Git and VS Code, aligns directly with your requirements for technical leadership and comprehensive integration needs.

My background in applying Salesforce recommended best practices, coupled with my developer certifications, ensures high-quality, clean, and sustainable code. I am confident that my proven ability to lead technical design, collaborate cross-functionally, and deliver production-ready Salesforce solutions makes me a strong candidate to advance the Salesforce practice at eTeam.

Thank you for considering my application.

Sincerely,
Triet Le
