fusionSpan - Senior Salesforce Consultant (US Working Hours)

Job URL

Dear Hiring Manager,

fusionSpan’s mission to deliver AI-powered, nonprofit-focused Salesforce solutions aligns closely with my experience as a Senior Salesforce Consultant specializing in business analysis and enterprise implementation. With over seven years driving Salesforce projects—including Sales Cloud, Service Cloud, nonprofit AMS integrations, and experience-led deployments—I have demonstrated success leading requirements gathering, solution crafting, and mentoring teams in fast-paced environments.

At Docker and AWS, I led multiple Salesforce implementations, orchestrating cross-functional collaboration and delivering on-time, on-budget outcomes. Notably, I designed Salesforce OmniStudio-based guided workflows and integrated AMS platforms like Fonteva and Nimble AMS to improve membership and service processes. I also partnered with data analysts and project managers to ensure data-driven, scalable CRM architectures.

My hands-on expertise with Salesforce configuration, integration, business process automation, and user security positions me to deliver immediate value in advancing fusionSpan’s technology services for nonprofits. I am eager to contribute strategic insights and leadership to drive functional innovation and client success in your enterprise projects.

Thank you for your consideration.

Sincerely,
Triet Le
